

# 023 Gymleco Incline Pec Fly

010 series, Plate Loaded

The Incline Pec Fly is one of the most popular chest machines from our assortment. Why? Thanks to its unique features such as the 3 different angles to train the chest. You also have the split back cushions to make the workouts both effective and ergonomic. We are sure you're gonna love it!

The Incline Pec Fly machine has back cushions that are divided and angled sideways. Basically, this makes your back lean against the naturally outward-angled cushions, which makes the shoulders move naturally during the whole movement. Additionally, you have the opportunity to choose the angle from 3 different positions. From neutral, 15% decline or 15% incline.

- Standard frame color: Black
- Standard cushion color: Black or Red
- Easy to set up.
- 3 different back angles to choose from
- Rubberized handles
- Individually loaded weight arms
- Divided back cushions for a more ergonomic movement
