026 Adjustable Incline Chest Press

010 Series, Plate Loaded

Gymleco 026 Incline Chest Press is a compact and stable machine designed for effective training of the upper chest and front deltoids. The machine features both traditional and neutral grips, allowing users to vary their hand position.

The individually moving lever arms provide a long, clearly converging movement. The adjustable backrest and split, angled back pads make it easy to find a stable and comfortable starting position.

- Compact and stable design
- Traditional and neutral grips
