Strength Machines and Core Equipment

Gymleco

”Our mission is to make not only Sweden, but the world, healthier, stronger and more sustainable.”’

- Kari Jernvall
Founder and Product Designer

Welcome

Welcome to the Gymleco Family

Gymleco is a Swedish, family-owned company driven by a passion for health, strength, innovation, and sustainability. Today, we are one of Europe’s leading designers and manufacturers of strength training equipment.

With customers worldwide, Gymleco has grown into a trusted gym machine brand known for innovative design and biomechanical precision. We offer a complete range of strength training and exercise equipment, and we are among the few manufacturers in the Nordics producing our equipment in-house.

We aim to be more than a supplier. We strive to be a total solution and a profitable, long-term investment for our customers.

Since 1994, Gymleco has focused on developing Swedish-made equipment that is functional, durable, and built for a long lifespan with minimal maintenance. We are truly passionate about fitness, and we invite you to join us in our ambition for a healthier world and a more sustainable future.

Why choose Gymleco?

- Decades of experience
- Biomechanical precision
- Innovative, original design
- Low maintenance
- Commercial-grade quality use
- Space-efficient footprint
- Suitable for all users
- Ergonomically correct movement
- Affordable quality

Our History

1994

Aims for a sustainable future

Gymleco was founded in 1994 in a small kitchen in the south of Sweden, with a clear vision: to provide the fitness market with affordable, functional, and sustainable gym equipment. From the start, the ambition was to develop low-maintenance strength machines with exceptional functionality and quality.

Our equipment was designed to be “muscle-driven” throughout the entire movement, delivering effective resistance without placing unnecessary stress on the joints.

The goal has always been to create equipment that lasts for decades. Many of our customers still use Gymleco machines purchased in the 1990s, and they are still performing at a high level today.

From day one, we have focused on unique and innovative design, long lifespan, and compact footprints. We believe in our own construction and engineering — products built for a sustainable future.

2026

Still going strong

Our head office is located in Eskilstuna, Sweden, near Stockholm. Under one roof, you will find our production facilities, warehouse, and showroom. This enables full quality control — from order to shipment — and ensures that every product meets our high standards.

Our customer focus is reflected in clear communication and dependable service. Because we manufacture in-house, we can shorten delivery times and provide customized solutions beyond the standard product range.

Gymleco remains a family-owned company, working every day toward our vision of a healthier and more sustainable future. We stand behind every product we develop, creating Swedish-made equipment that combines correct movement, ease of use, and outstanding performance.

Everyone should be able to train correctly and safely. That is why Gymleco machines are designed to maximize training results, whether you are a beginner or a professional athlete. Most importantly, every movement is biomechanically correct.

Machine Features

Gymleco machines are engineered for professional performance, combining superior biomechanics, durable construction and a clean Scandinavian design.

A Professional Look That Sells

Gymleco machines combine function, form, and finish. The solid construction and clean Scandinavian design communicate quality instantly, elevating both the gym environment and the member experience.

Maintenance-Free Performance

Equipped with maintenance-free bearings and high-quality components, Gymleco machines ensure minimal friction, silent operation, and reduced service requirements — lowering total cost of ownership.

PowerBand™ Drive System

Gymleco machines use PowerBand™ instead of cables, eliminating stretching and adjustments. It delivers a smooth, consistent feel throughout the full range of motion and comes with a 10-year guarantee in our 300-series machines.

Superior Ergonomics and Comfort

Seats, pads, and contact points are ergonomically designed to ensure optimal positioning. High-density upholstery delivers lasting comfort, even under heavy, continuous use.

Built for a Lifetime

All Gymleco machines are constructed using heavy-duty steel profiles and reinforced welding joints. This results in exceptional stability and durability, which is why we offer a lifetime warranty on steel frames and welds.

Smart, Stable Design

Thoughtful features such as integrated weight stacks, stable foot platforms, and non-slip grips create a safe and controlled training experience. Machines can also be floor-bolted for maximum stability in commercial environments.

Biomechanics at the Core

Every movement is engineered to follow the body's natural strength curve. Gymleco machines provide smooth, consistent resistance throughout the entire range of motion, maximizing training efficiency while reducing joint stress.

Customizable Design Options

Choose frame colors, upholstery, and details to match your gym's identity. Gymleco offers extensive customization without compromising durability or performance.

Assistance

You can handle everything yourself — but you don't have to. Gymleco supports you throughout the entire process, from gym planning to delivery and installation. When selecting equipment, our specialists provide guidance and recommendations tailored to your facility, goals, and budget. Together, we review your needs and create the best possible solution.

Ideas and planning
Our team supports you with gym planning, layout design, and floor plans for both small and large facilities. We help you find smart, sustainable solutions that optimize space, strengthen your business, and create the best possible training experience.

Delivery
We offer fast delivery to gyms, companies, and private customers. Gymleco delivers worldwide. If there is a local distributor or sales office in your country, they will support you throughout the process.

Assembly and Installation
In most cases, our machines are delivered fully assembled. Installation at your facility can be arranged through Gymleco staff or approved third-party partners. If you are located in a country with an official distributor, installation arrangements are handled directly between you and your local partner.

Warranty

Warranty – ISO 9001 Quality Assurance
Gymleco's warranty program ensures that your equipment remains reliable and fully functional over time. Our products are designed and manufactured for high performance combined with low-maintenance operation. To maintain consistent quality and continuous improvement, Gymleco follows the ISO 9001 quality management system.

Our warranty clearly defines coverage for key equipment components, and spare parts are always kept in stock for fast delivery.

- Lifetime warranty on all steel frames and welds (covers manufacturing and material defects).
- 10-year warranty on Powerband™ (300-series only), band stretching systems, bearings, band wheels, and seat adjustment systems (covers manufacturing and material defects).
- 1-year warranty on upholstery pads and Powerband™ (200-series).

ISO 9001 Quality Management System
Gymleco operates according to the ISO 9001 quality management system to ensure control, continuous improvement, and reliable manufacturing processes. This structured approach improves efficiency and ensures the highest product quality for our customers.

The goals of ISO 9001 include: superior quality, accurate delivery, competitive pricing, fast production, and high service levels. Since all Gymleco products are produced in-house, we maintain full control over both quality and production standards.

We take pride in every product we manufacture, and we strive to provide the finest gym equipment on the market.

010 SERIES

Plate Loaded Machines

Plate loaded machines are strength training machines where the resistance is loaded using weight plates. Gymleco's plate loaded equipment is engineered for high performance, low maintenance, and a space-efficient footprint to help you optimize your gym layout and fit more machines on the floor.

Each machine is designed with a carefully developed movement path to support correct biomechanics and a natural training feel. With minimal adjustments, the machines are easy to use for both beginners and experienced athletes.

Built with premium commercial-grade materials, Gymleco plate loaded machines are made to withstand heavy usage year after year, without frequent service needs or parts failure.

The levers are independently linked, allowing unilateral movement and improving coordination between the left and right side. This design supports faster development of muscle balance.

244 Hack Lift

Leg Press 45°
Art.nr: 243

This leg machine has a tasteful design, stable construction and is space efficient. The large footplate and the ergonomically designed seat provides great freedom in the exercise. An additional central handle facilitates the access to the machine.

The trolley weighs 56kg (at a 45 degree inclination in the machine, 39.5 kg of that weight comes to the feet).

Length: 218 cm
Width: 78 cm
Height: 142 cm
Weight: 161,5 kg

Hack Lift
Art.nr: 244

This hacklift machine provides you a tasteful design and an open construction without compromising on function or stability. You both save space at the gym and have a great, safe machine for the users.

The trolley weighs 47,4kg (at a 45 degree inclination in the machine, 33.5 kg of that weight comes to the feet)

Length: 195 cm
Width: 80 cm
Height: 145 cm
Weight: 137,5 kg

Leg Press/Hack Lift
Art.nr: 245

This Leg Press / Hacklift is probably the only combination machine in the world where you can switch exercise with only one setting and no loose parts. This combinated leg machine has a small footprint and smart design. For example the weight plates are loaded in the centre of the machine instead of the outside.

Length: 230 cm
Width: 81 cm
Height: 145 cm
Weight: 180 kg

100 SERIES

Core Gym Equipment

Gymleco's core equipment is manufactured to commercial standards and is an ideal choice for professional gyms that demand durable, long-lasting products.

The 100-series consists of user-friendly equipment suitable for a wide variety of gym environments. Here you will find benches, bench press stations, racks, and selected plate loaded machines. Every product is built for heavy use and has been tested and proven for over 30 years.

If you are also looking for gym accessories such as dumbbells, barbells, and weight plates, please refer to our accessories catalog.

200 SERIES

Cable Machines and Multi Gyms

The 200-series includes Gymleco's cable machines and multigyms, engineered for optimal performance and compact footprints. These machines are designed to deliver a smooth training experience with low friction and consistent resistance, resulting in better feel and improved training quality.

A key feature of Gymleco's cable machine design is the use of Powerband™ instead of traditional wire cables. Unlike wire systems, Powerband™ does not require adjustment, as it does not stretch in the same way over time. It also provides a smoother movement compared to conventional cable machines.

If needed, machines can be ordered with larger weight stacks to match user requirements.

300 SERIES

Selectorized Machines

The 300-series consists of premium selectorized machines with integrated weight stacks. These machines are designed for facilities that demand the highest level of performance, durability and design quality.

At Gymleco, function always comes first. The 300-series features unique details such as Powerband™, which never requires adjustment, ensuring smooth and consistent performance over time. The weight stacks also feature a distinctive design that adds a premium and eye-catching look to any gym

Constructed with commercial-grade materials, these machines are built to withstand years of heavy strength training. The compact footprint and timeless design make them ideal for modern fitness facilities. The movement patterns are simple, ergonomic and biomechanically correct, making them suitable for all user levels.

Some 300-series machines include an “R” after the article number, indicating an adjustable start angle.

If desired, machines can be ordered with larger weight stacks customized to user needs

Height: 186 cm

Weight: 211 kg
Weight Stack: 100 kg

Iso Lateral Low Row
Art.nr: 312

Length: 121 cm
Width: 81 cm
Height: 166 cm

Weight: 206 kg
Weight Stack: 100 kg

Chins /Dips
Art.nr: 314

Length: 126 cm
Width: 120 cm
Height: 200 cm

Weight: 236 kg
Weight Stack: 100 kg

Incline Chest Press
Art.nr: 320

Length: 156 cm
Width: 122 cm
Height: 173 cm

Weight: 218 kg
Weight Stack: 100 kg

Seated Chest Press
Art.nr: 321

Length: 139 cm
Width: 137 cm
Height: 149 cm

Weight: 224 kg
Weight Stack: 100 kg

311 Iso Lateral Pulldown

Seated Pec Deck
Art.nr: 323

Length: 146 cm
Width: 171 cm
Height: 150 cm

Weight: 198,5 kg
Weight Stack: 100 kg

Pullover
Art.nr: 324

Length: 143 cm
Width: 89 cm
Height: 172 cm

Weight: 190 kg
Weight Stack: 100 kg

Standing Pec Fly
Art.nr: 326

Length: 116 cm
Width: 148 cm (widest point)
Height: 178 cm

Weight: 200 kg
Weight Stack: 120 kg

Standing Side Lateral
Art.nr: 334

Length: 116 cm
Width: 82 cm
Height: 160 cm

Weight: 190 kg
Weight Stack: 80 kg

Rear Deltoid/Pec Deck
Art.nr: 335

Length: 147 cm
Width: 70 - 174 cm
Height: 149 cm

Weight: 224 kg
Weight Stack: 100 kg

Shoulder Front Press
Art.nr: 336

Length: 120 cm
Width: 110 cm
Height: 165 cm

Weight: 240 kg
Weight Stack: 100 kg

Shoulder Press
Art.nr: 330

Length: 155 cm
Width: 125 cm
Height: 165 cm

Weight: 234 kg
Weight Stack: 100 kg

Shoulder Rotation
Art.nr: 331

Length: 87 cm
Width: 75 cm
Height: 135 cm

Weight: 168 kg
Weight Stack: 80 kg

Rear Deltoid Shoulder
Art.nr: 333

Length: 147 cm
Width: 70 - 174 cm
Height: 149 cm

Weight: 224 kg
Weight Stack: 60 kg

Leg Extension
Art.nr: 340

Length: 95 cm
Width: 99 cm
Height: 162 cm

Weight: 202 kg
Weight Stack: 100 kg

Leg Extension Adjustable
Art.nr: 340R

Length: 95 cm
Width: 99 cm
Height: 162 cm

Weight: 213 kg
Weight Stack: 100 kg

Seated Leg Curl
Art.nr: 341

Length: 135 cm
Width: 95 cm
Height: 149 cm

Weight: 163,5 kg
Weight Stack: 80 kg

Lying Leg Curl
Art.nr: 342

Length: 170 cm
Width: 97 cm
Height: 149 cm

Weight: 173,5 kg
Weight Stack: 80 kg

Lying Leg Curl, Adjustable
Art.nr: 342R

Length: 170 cm
Width: 97 cm
Height: 149 cm

Weight: 182,5 kg
Weight Stack: 80 kg

Seated Leg Press
Art.nr: 343

Length: 221 cm
Width: 116 cm
Height: 162 cm

Weight: 316 kg
Weight Stack: 150 kg

Seated Calf Press 45°
Art.nr: 348

Length: 140 cm
Width: 100 cm
Height: 142 cm

Weight: 255 kg
Weight Stack: 150 kg

Leg Extension /Leg Curl
Art.nr: 349

Length: 115 cm
Width: 99 cm
Height: 163 cm

Weight: 224 kg
Weight Stack: 100 kg

Biceps Curl machine
Art.nr: 350

Length: 100 cm
Width: 95 cm
Height: 153 cm

Weight: 153 kg
Weight Stack: 60 kg

Horizontal Lying Leg Press
Art.nr: 344 **NEW!**

Length: 221 cm
Width: 116 cm
Height: 162 cm

Weight: 316 kg
Weight Stack: 150 kg

Seated Calf Press
Art.nr: 345

Length: 120 cm
Width: 60 cm
Height: 140 cm

Weight: 203 kg
Weight Stack: 120 kg

Standing Calf Press
Art.nr: 347

Length: 130 cm
Width: 60 cm
Height: 180 cm

Weight: 247 kg
Weight Stack: 150 kg

Triceps Extension
Art.nr: 351

Length: 136 cm
Width: 67,5 cm
Height: 134 cm

Weight: 182 kg
Weight Stack: 100 kg

Dips Press /Shoulder Pull
Art.nr: 354

Length: 174 cm
Width: 85 cm
Height: 136 cm

Weight: 235 kg
Weight Stack: 100 kg

Biceps /Triceps
Art.nr: 355

Length: 129 cm
Width: 84 cm
Height: 149 cm

Weight: 170 kg
Weight Stack: 60 kg

Forearm machine
Art.nr: 356

Length: 61 cm
Width: 75 cm
Height: 136 cm

Weight: 147,5 kg
Weight Stack: 80 kg

Forearm Curl
Art.nr: 357

Length: 93 cm
Width: 78 cm
Height: 103 cm

Weight: 152 kg
Weight Stack: 80 kg

Gluteus, One Leg kick
Art.nr: 360

Length: 86 cm
Width: 75 cm
Height: 136 cm

Weight: 187 kg
Weight Stack: 100 kg

Lumbar/Abdominal (with armrest)
Art.nr: 365B

Length: 100 cm
Width: 90 cm
Height: 160 cm

Weight: 230 kg
Weight Stack: 100 kg

Multihip
Art.nr: 369

Length: 115 cm
Width: 110 cm
Height: 160 cm

Weight: 177 kg
Weight Stack: 60 kg

Seated Abs machine
Art.nr: 370

Length: 170 cm
Width: 101 cm
Height: 104 cm

Weight: 176 kg
Weight Stack: 60 kg

Standing Abductor
Art.nr: 362

Length: 110 cm
Width: 65 cm
Height: 142 cm

Weight: 210 kg
Weight Stack: 100 kg

Adductor/Abductor
Art.nr: 364

Length: 130 cm
Width: 86 cm
Height: 137 cm

Weight: 192 kg
Weight Stack: 80 kg

Lumbar/Abdominal
Art.nr: 365A

Length: 100 cm
Width: 90 cm
Height: 160 cm

Weight: 225 kg
Weight Stack: 100 kg

Torso Rotation
Art.nr: 375

Length: 120 cm
Width: 75 cm
Height: 139 cm

Weight: 155 kg
Weight Stack: 60 kg

Kneestanding Abdominal
Art.nr: 376

Length: 95 cm
Width: 65 cm
Height: 125 cm

Weight: 146,5 kg
Weight Stack: 60 kg

900 SERIES

Circuit Machines

Gymleco's 900-series offers commercial circuit training machines designed for fitness centers, corporate gyms, and rehabilitation facilities. The series consists of ten double-acting hydraulic machines covering all major muscle groups, enabling full-body training that is both fast and efficient.

Whether you want to add a few circuit machines to your facility or build an entire circuit zone, the Gymleco 900-series is a reliable and effective choice.

The machines use hydraulic resistance and are extremely easy to understand and use for all training levels and ages. Most machines offer two exercises in one, making the series highly space-efficient and versatile. You will find at least one machine per muscle group, making it ideal for full-body circuit programming.

Circuit training has been popular in gyms for decades. Many facilities place the machines in a circular layout and use them for group circuit classes. This setup provides a complete full-body workout in a single session, and the machines are also well suited for rehabilitation training.

Pulldown /Shoulder Press
Art.nr: 911

Length: 113 cm
Width: 69 cm
Height: 115 cm
Weight: 45 kg

Chest Press / Back
Art.nr: 921

Length: 101 cm
Width: 76 cm
Height: 124 cm
Weight: 43 kg

Pec Dec/ Rear Deltoid Shoulder
Art.nr: 935

Length: 100 cm
Width: 125 cm
Height: 112 cm
Weight: 50 kg

Biceps / Triceps
Art.nr: 955

Length: 100 cm
Width: 76 cm
Height: 125 cm
Weight: 45 kg

Adductor /Abductor
Art.nr: 964

Length: 133 cm
Width: 74 cm
Height: 112 cm
Weight: 56 kg

Abs /Lower Back
Art.nr: 965

Length: 100 cm
Width: 83 cm
Height: 135 cm
Weight: 46 kg

Squat /Hacklift
Art.nr: 944

Length: 173 cm
Width: 86 cm
Height: 107 cm
Weight: 67 kg

Leg Extension /Legcurl
Art.nr: 949

Length: 105 cm
Width: 77 cm
Height: 117 cm
Weight: 63 kg

Shoulder Lift /Dips
Art.nr: 954

Length: 100 cm
Width: 69 cm
Height: 112 cm
Weight: 45 kg

Waist Rotator
Art.nr: 975

Length: 89 cm
Width: 66 cm
Height: 104 cm
Weight: 38 kg
